

At East Quay we believe in providing the best level of care and attention, tailored to meet the needs of each person we see. This philosophy also extends to all our eye care services. During your visit we take the time to clearly explain the procedures carried out and your results so you can understand what it all means.

Six Sunglass Tips

1. Wear sunglasses which carry a British Standard, CE, or UKCA quality mark, because the UV filter protects the eyes and the skin around them.
2. Make sure children wear sunglasses because their bigger pupils make the risk of sun damage much higher.
3. Choose sunglasses that sit close to the eyes to block out more light.
4. Check if your prescription lenses include a UV filter, for everyday protection. (Any SapphireUV coated lenses supplied by East Quay contain E-spf 25 as standard, and Transitions lenses block UV.)
5. Wear a wide-brimmed sun hat for extra protection.
6. Avoid sunglasses without a British Standard, CE, or UKCA mark or an indication of UV protection - low-quality tinted lenses without a UV filter can do more damage than not wearing sunglasses at all, because they cause the pupil to dilate, letting in more UV light!

OCT scans now available with upgraded exams

- Unobtrusively see through the layers behind your retina with a 3D OCT scan, enabling our optometrists to see any abnormalities earlier.
- Scans can detect macular degeneration, glaucoma, diabetes or monitor for any change if you have a family history of these conditions.
- Available as part of our premium private eye examination, or upgrade an NHS sight test for a small fee.

East Quay Vision

To celebrate our 15th anniversary we are giving all patients who order glasses in July a **complimentary glasses cleaning and servicing kit** and entering all those patients into a raffle to receive a **£100 spectacle voucher**.
