

At East Quay we believe in providing the best level of care and attention, tailored to meet the needs of each person we see. This philosophy also extends to all our eye care services.

During your visit we take the time to clearly explain the procedures carried out and your results so you understand what it all means.

Transitions Offer

During **October** we are offering 20% off discount on transition lenses

Thursday	– 8.15am – 5.30pm
Friday	– 8.15am – 5.30pm

Take your first step to better hearing with the global specialists

1 in 6 people in the UK miss out on the little things in life, simply because of their hearing. Whether it's struggling to hear the TV or having difficulty in conversations, many people don't realise these are common signs of hearing loss.

At Amplifon, we've been championing hearing health for over 65 years. With over 200 hearing centres in the UK, our expert Audiologists are there to offer you professional advice, care and peace of mind, and we'll be on hand in Bridgwater from 6th June 2018.

Our unique testing process

Our hearing test is one of the most thorough in the industry, giving our expert Audiologists a deeper understanding of your hearing health. We'll examine your ears to look for the early conditions of hearing loss, and then support this with the latest testing techniques, such as word recognition testing with background noise, so we can replicate how your hearing is affected in real life scenarios.

Most importantly, we don't believe that you should pay to check your hearing health, which is why our hearing test is **completely free of charge.**

Book your free hearing health check now at East Quay Medical Centre in Bridgwater on **01823 210 239**

WAYS TO REDUCE YOUR CARBON FOOTPRINT

- Reuse and recycle your rubbish waste
- Pay attention to packaging and use reusable bags
- Ditch bottled water and get a reusable canteen or flask
- Buy organic and local produce that was grown in an eco-friendly way
- Save energy by turning off your appliances and use energy saving devices
- Keep the heat in and insulate your home
- Conserve water and watch your usage
- Travel green and walk, cycle or use public transport
- Grow your own food

FUNDUS PHOTOGRAPHY

Modern technology means that your optometrist can now use a special camera to take photographs of the inside of your eyes. This allows us to see any abnormalities very easily, and provides a permanent record of the condition of your eyes at a certain date. This is especially useful if you have diabetes, glaucoma, or many other conditions as we can compare any changes to the 'snapshot' we have on record.

Each time you visit us we can take photographs of the inside of your eyes and compare them to photographs that we took last time. It is much easier to spot problems if we can see how your eyes are changing over time. And the earlier we spot problems, the more likely it is that they can be treated before they cause irreversible damage. The process itself doesn't hurt at all – all that is involved is a brief flash of light as the photograph is taken and the image will appear on the computer screen.

This procedure is currently private as the NHS do not provide for this examination. If you are eligible for NHS there is a charge of £28. If you are a private patient then ask for the private upgrade which will be £49 for the full exam including sight test.
